Restriction

For purposes of restriction it is assumed that claim 24 meant to depend from claim 19 (not 18) since claim 18 has been cancelled. Furthermore, for purposes of restriction it is assumed that claim 73 meant to depend from claim 71 since claim 73 states that it depends from itself. Furthermore, for purposes of restriction it is assumed that claim 76 meant to depend from claim 73 since claim 76 states that it depends from claim 77 and therefore it is not dependent from a prior claim in compliance with the MPEP.

This application contains claims directed to the following patentably distinct species of the claimed invention: Group Ia, claims 19-24 and 71-79, directed to a species of method of producing an optical device comprising the steps of injection molding using a metallic mold formed with a projection with a concavity reproducing the shape of the projection and filling the concavity of the mold; Group Ib, claims 25-33, directed to a species of method of producing an optical device comprising the steps of forming a resist having a hole, forming a concavity corresponding to the hole by etching, removing a resist and filling the concavity; Group Ic, claims 34-42, 48-51, and 89-98, directed to a species of method of producing an optical device comprising the steps of forming on an optical portion provided with a projection another optical portion to bury the projection and removing the first portion from the other optical portion to expose a concavity; Group Id, claims 43-47 and 80-88, directed to a species of method of producing an optical device comprising the steps of forming resist films having windows, forming concavities corresponding to the windows, removing the resist films, and filling

the concavities; Group Ie, claims 107-111, directed to a species of method of producing an optical device by using a mold having a concavity formed by a pin that penetrates through a wall of the concavity from the outside and projects into the concavity, and filling the concavity with an optical material in a molten or softened state.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
